

Updated Roadmap – “Next-Level” Vision

(Philosophy: The app should feel invisible. Communication is the goal, not another app to check.

We become the user’s “second brain” that lives one tap away, works mostly in the background, and only surfaces when truly needed.)

Phase	Goal / Tagline	Core Channels & Integrations	Capture & Clarify	Prioritize & Organize	Schedule & Sync	Interface & Access Philosophy	Key New Features & Differentiators
MVP (v0)	“It just works in the background”	<ul style="list-style-type: none">• Gmail (read-only)• Slack (read-only, DMs + mentions)	<ul style="list-style-type: none">• Trigger-based extraction only (deadlines, explicit tasks, meeting requests)• No manual entry required	<ul style="list-style-type: none">• Simple rule-based priority (P1 today, P2 this week, P3 no deadline)• Sender importance list (user can mark VIPs)	<ul style="list-style-type: none">• Auto time-blocking on Google/Apple/Outlook Calendar• Daily plan email/summary at 6 am	<ul style="list-style-type: none">• Extremely minimal dashboard (web + mobile)• Most users never open the app after setup• All notifications via calendar + optional push	<ul style="list-style-type: none">• First product that truly extracts & schedules without any manual task creation• 100 % hands-off for 80 % of use cases• “Set-once-and-forget” onboarding

Version 1.0	<p>“One-tap accessible everywhere, zero friction”</p>	<p>+ WhatsApp + iMessage/SMS (iOS/Android) + Basic voice (transcribe voice notes)</p>	<ul style="list-style-type: none"> • Quick “Yes / No / Edit” clarification widget (appears as system notification or lock-screen banner) • “Is this a task?” one-tap resolve 	<ul style="list-style-type: none"> • ML priority engine (learns from user overrides) • Context grouping (by project/person) • Learns user’s energy patterns (morning person?) 	<ul style="list-style-type: none"> • Smart rescheduling when conflicts arise • Preference-based time-blocking (deep work blocks, no-meeting days, etc.) • Protects focus time automatically 	<ul style="list-style-type: none"> • Homescreen widget / App Clip / Action Extension (iOS) & Quick Settings tile (Android) • Web extension (Chrome/Arc) for one-click “Save this as task” • Siri / Google Assistant shortcut: “Hey Assistant, remember this” 	<ul style="list-style-type: none"> • Always one gesture/tap away on every device • Offline-first quick capture using on-device quantized LLM (notes & basic classification) • Transparent weekly report (“You saved 4.2 h of planning this week”) • Full offline → online sync
Version 1.1	<p>“Your invisible Chief of Staff”</p>	<p>+ Microsoft Teams + Linear / Jira / Notion (read-only task sync) + Apple Watch & Android Wear</p>	<ul style="list-style-type: none"> • Friendly micro-interactions (“Shall I block 45 min tomorrow for this doc review?” → thumbs up/down) • Auto-defer low-priority items with suggested dates 	<ul style="list-style-type: none"> • Full context awareness (knows current project from recent emails/Slack) • Predictive priority (e.g., “Your Q4 OKR review is in 9 days → bump related tasks”) • Habit & weekly planning 	<ul style="list-style-type: none"> • Meeting-prep summaries pushed 15 min before calls • Auto-creates prep blocks • Smart notifications (only breaks flow when truly urgent) 	<ul style="list-style-type: none"> • Zero-screen mode possible (everything via calendar + native notifications) • Optional beautiful daily briefing (voice or text) • Watch complication: next 3 tasks + “I’m free” button 	<ul style="list-style-type: none"> • Meeting prep summaries (who’s attending, past context, open tasks) • “Mind like water” score shown weekly & gentle nudges • Full offline intelligence on phone (capture + basic scheduling) • Start of “AI Companion” personality (light, witty,

knows your
style)

Long-term Vision (v2.0 and beyond – not in scope yet)

- Negotiate meeting times & send messages on your behalf (with approval)
- Autonomous execution of simple actions (e.g., “Order lunch”, “Book flight”)
- Cross-user coordination (“Find a time with Alex & Sarah next week”)
- Full memory layer (like Rewind) but privacy-first and user-owned
- Becomes a true lifelong companion that grows with you

Core Principle That Ties Everything Together

The app should disappear.

Most users will open it <1× per week after the first month.

Everything else happens in the tools you already live in: Calendar, Notifications, Lock screen, Watch, Voice.

This is the first AI Planning Assistant that truly feels like an executive assistant who sits quietly in the background and only taps you on the shoulder when absolutely necessary.
